Penelitian ini bertujuan untuk mengetahui hubungan antara Religiusitas dengan *Psychological Well Being* ditinjau dari *Big Five Personality* pada siswa SMA Negeri 6 Binjai. Hipotesis yang diajukan dalam penelitian ini ada dua yaitu, terdapat hubungan antara religiusitas dan *psychological well being* pada siswa SMA Negeri 6 Binjai dan terdapat perbedaan antara *psychological well being* ditinjau dari *big five personality* pada siswa SMA Negeri 6 Binjai. Analisis data yang digunakan dalam penelitian ini adalah analisis kovarian. Penelitian ini dilakukan pada Siswa SMA Negeri 6 Binjai kelas X dan XI tahun pelajaran 2013/2014. Pengambilan sampel ini dilakukan dengan metode *random sampling*, dengan jumlah sampel 85 siswa dari jumlah populasi. Analisis yang digunakan adalah analisis kovarian, karena bertujuan untuk menguji hipotesa dari satu variabel terikat (y), satu variable bebas (x), dan satu kovariabel. Berdasarkan hasil analisis data diatas diperoleh $F = 2395,290$ dengan signifikansi 0,000 dan $p < 0,05$. Berdasarkan hasil tersebut dapat dikatakan bahwa terdapat hubungan antara religiusitas dan *psychological well being* pada *big five personality*. Kemudian diperoleh diperoleh $F = 1,845$, sig 0,128 dengan $p > 0,05$ yang berarti bahwa tidak ada perbedaan *psychological well being* diantara ke lima tipe kepribadian *big five personality*.

Kata Kunci : *Psychological Well Being*, Religiusitas, *Big Five Personality*
