**ABSTRAK**

Penelitian ini bertujuan untuk mengetahui hubungan antara religiusitas dan iklim kelas dengan kecerdasan emosional santri.

Sampel penelitian ini berjumlah 123 santri. Sampel dipilih dengan menggunakan teknik *proportional stratified random sampling* dari seluruh santri dari kelas IV dan V Pondok Pesantren Ar-Raudatul Hasanah Medan. Instrumen penelitian menggunakan angket yang sebelumnya telah diujicobakan. Angket terdiri atas tiga skala, yaitu skala religiusitas, skala iklim kelas, dan skala kecerdasan emosional. Data yang diperoleh kemudian dianalisis secara deskriptif dan inferensial.

Hasil penelitian menggunakan analisis regresi menunjukkan bahwa: 1). Adanya hubungan positif dan signifikan antara religiusitas dan kecerdasan emosi, dengan sumbangannya efektif sebesar 75.6%, 2). Adanya hubungan positif dan signifikan antara iklim kelas dengan kecerdasan emosi, dengan sumbangannya efektif sebesar 72.6%, 3). Adanya hubungan yang positif dan signifikan antara religiusitas dan iklim kelas dengan kecerdasan emosi, dan secara bersama-sama memberikan sumbangannya efektif sebesar 78.5% .

Kata Kunci: religiusitas, iklim kelas, dan kecerdasan emosi.

**Relation Religiousness and Class Climate With Emotional Intelligence  
Students on Islamic Boarding School Ar-Raudatul Hasanah Medan**
